Experience

Product Engineering Tutor Passerelles Numériques

Da Nang, Vietnam
February 2019 → June 2019

www.passerellesnumeriques.org

PN provides education and IT training to young underprivileged people to build their employability and allow them to escape poverty in a sustainable way. During this 5 month volunteering, I mentored 3rd year students on their final project. I did a lot of brainstorming about their product user stories, prototypes, wireframes, UI and UX research.
Tech: React.js, React Native, Node.js

Lead Front-end Engineer Skwarel

Brussels, Belgium
March 2016 → February 2019

www.skwarel.com

I joined the startup as the 4th member, took charge of the Front-end architecture, while upgrading the current platform to the latest technologies. I designed, coded and published a Nativescript mobile app to the App store and Google Play Store. I mentored a small team of developers, as well as many interns during diverse projects. I prototyped, designed and coded the main front platform, in Angular with NgRx, code testing and code automation.
Tech: Angular, Angular.js, Nativescript

Full-stack Developer Dour Festival

Liège, Belgium
December 2012 → July 2013

www.dourfestival.eu

During this 6 month internship, I developed a new platform to help the booking agent update all the informations about the bands performing at the festival. I also created a web platform and hardware solution, to scan wristbands and do access control during the festival.
Tech: Zend Framework, Bootstrap, PHP, MySQL

Education

Catholic University of Louvain-la-Neuve - UCL

Master in Computer Science, Software Engineering

September 2013 → June 2015
Grade : Unfinished

EPHEC Louvain-la-Neuve

Bachelor in Computer Science, Web Development

September 2009 → June 2013
Grade : Distinction
